

TJ Transport Case Study

Discover how fissara® MOVE helped TJ Transport make significant cost, time & administrative savings across its entire business operation

TJ Transport, a leading bulk haulage specialist, has been serving the construction, building materials and waste industries for over 20 years. The company operates more than 100 vehicles across the UK.

TJ Transport has seen several operational and profitability improvements across the business since they started using fissara® MOVE in February 2020.

fissara® MOVE is a cloud-based workforce management platform designed specifically for the bulk haulage and waste transport sectors.

Optimising business operations

Since its implementation into TJ Transport, fissara® MOVE has helped the company:

Consolidate invoicing into one digital platform to improve invoice accuracy, timeliness, customers satisfaction and finance administration time.

Provide their drivers with a complete overview of each job from the fissara MOVE mobile app, simplifying the way drivers handle transfer/conveyance notes. Speed, accuracy, and adherence to duty of care regulations have all improved as a result.

Migrate unsecure paper calendars, workbooks, spreadsheets and ad hoc files into fissara MOVE. Critical operational information is now accessible by key members of staff to view securely and in real-time from the fissara MOVE cloud platform.

Overcome the challenges of COVID-19 by using the fissara MOVE to record proof of delivery using photographs and GPS coordinates, thus reducing the need for person-to-person contact. This has resulted in faster invoicing and improved cash flow for the business.

Maintain social distancing measures in the office; staff can access fissara MOVE from any location (via a PC or tablet) to deal with invoicing, job notes, job amendments and filing transfer/conveyance notes.

Significantly reduce admin time (up to 35 hours per week) compiling vehicle costings and P&L reports using fissara MOVE's reporting system. The ability to 'pull' data almost instantly means that TJ Transport can respond to operational issues more quickly.

In the bulk haulage business, we've been waiting for a powerful management tool like fissara MOVE for a long time. It is the jewel in the crown of our operations, allowing us to be more efficient by providing our office staff and drivers with a one-stop-shop for all their planning, invoicing, and job management needs.

fissara MOVE has also improved communication between our customers, office, and drivers. Staff are much happier; the system has strengthened each department in the business, made office teams and drivers much more efficient and reduced the amount of duplication between teams. This has increased operational profitability across the business.

John Gosling, Managing Director at TJ Transport

Digitise to survive and thrive

Software and technology are becoming the norm for businesses looking to increase efficiencies and improve profitability. This has become more important than ever in 2020, where our businesses face new challenges of operating remotely or with minimal person-to-person contact.

Many companies are adapting to the need for better efficiency by migrating tasks such as job scheduling, people management, stock control, diaries and information capture into fissara.

Available as a desktop suite and mobile app, fissara connects you with your people when they're on the road, in the office or working from home.

With fissara, important tasks and operational procedures can be controlled from one place, providing major improvements to profitability, efficiency and sustainability.
